**THORNTON-WOODSTOCK INTERSTATE 93 WORK RESUMES**  
**WILL REQUIRE CLOSURE OF TWO EXIT 30 RAMPS FOR NINE WEEKS**

The New Hampshire Department of Transportation announces work is scheduled to resume the week of March 25, 2002 on Interstate 93 bridge and road rehabilitation work between Exits 29 and 30 in the towns of Thornton and Woodstock.

Traffic on I-93 will travel in a single lane, both northbound and southbound, through the bridge work areas.

Beginning April 1, this project will require the closure of two ramps at Exit 30 for nine weeks. The Exit 30 northbound on-ramp and southbound off-ramp will remain closed until May 25. Traffic that would normally use these ramps should use Exits 29 or 31 during the closure period.

The closed ramps are scheduled to be reopened for the Memorial Day weekend traffic.

R.S. Audley, of Bow, New Hampshire, is the general contractor for the \$14 million contract, which has a final completion date of June 2003.
